The subject lands have a SULA application for an industrial lease for a wind farm (SULA 1536). Because of the possible conflicts between utilizing the subject lands for both uses, the applicant for the material permits was requested to submit information in regards to specific parts of the subject lands he desired to mine. Response has not been received.

Upon recommendation of Mr. Tom Faddies, the Director rejected the above-listed application.

PARTIAL BOND RELEASE FOR MINERAL LEASE ML 29434 – LIMESTONE

No production of the leased substances has been reported since the fourth quarter of 2006 on the above-numbered lease. The lease was terminated under its own terms and conditions and was canceled on the records of the Trust Lands Administration effective April 4, 2008. The lessee has engaged in mined land reclamation of the leased lands. Such reclamation is now complete, and the lessee has requested a partial bond release. The Utah Division of Oil, Gas and Mining ("DOGM") is proposing to release \$18,000 of the \$25,000 surety, retaining \$7,000 for any potential reseeding that may be needed. Performance bond for this mineral mining permit (M0410004) is held on trust lands by DOGM and requires concurrence by the Trust Lands Administration for its release.

METALLIFEROUS MINERAL LEASE READJUSTMENT AND EXTENSION – ML 48168 (UNIV)

Metalliferous Minerals Lease ML 48168 will reach the end of its ten (10) year primary term on January 31, 2009. Under Article II of the lease, it is expressly agreed that at the end of each period of ten (10) years, following the effective date of the lease, the State of Utah, as Lessor, shall have the right to readjust the terms and conditions of the lease as may be determined to be in the best interest of the State of Utah, as trustee owner of the mineral estate.

RELEVANT FACTS:

Uranium One Utah, Inc., the mineral lessee of record, by letter dated January 26, 2009, has requested a ten-year extension of the above-referenced lease. The surface estate of the land encompassed by the referenced Metalliferous Minerals Lease was, on March 1, 1982, conveyed to Plateau Resources Ltd. via Patent No. 18761. Plateau Resources subsequently constructed the Shootering Uranium Mill on a portion the surface estate. On January 1, 1982, Plateau Resources Ltd. leased the metalliferous minerals of the referenced land to avoid any potential conflict with a third party mineral lessee. Prior to 1982 there is no record that the mineral estate of the subject land had ever been leased. There are no known mineral resources identified on the subject lands. The main uranium bearing members of the Morrison Formation have been eroded from the surface of the subject lands which may account for lack of mineral leasing prior to 1982. The original mineral lease of 1982 expired by its own terms on December 31, 1991. With a rise in uranium prices and a refurbishing of the Shootering Uranium Mill, the subject lands were again leased for metalliferous minerals by Plateau Resources Ltd. on January 1, 1999. In March of 2007, the surface estate of the subject land and the uranium mill were sold to Uranium One Utah, Inc. and, the metalliferous minerals lease was also assigned to Uranium One Utah, Inc. It is important to Uranium One Utah, Inc. that no third party acquires access to the land that was acquired for the purpose of operating the Shootering Uranium Mill. Given the proximity of the uranium mill to other trust lands that do contain known uranium resources, it is also in the interest of the Trust that the mill operates without conflict created by other actions of the Trust Lands Administration.

LEASE READJUSTMENT AND TERMS:

- The lease will be readjusted to conform to the terms and conditions provided for under Trust Lands Administration's most current Metalliferous Minerals Lease Form, adopted for use April 2008 and most recently revised August 2008.
- The current Metalliferous Minerals Lease Form requires an annual rental payment of \$500 or \$1 per acre - whichever is greater. For leases that are extended beyond their initial primary term, the lease requires an annual advanced minimum royalty in the amount of three (3) times the annual rental. Readjustment of ML 48168 will require an annual rental of \$500 and the annual advanced minimum royalty of \$1,500 (3 X annual rental) for a total annual payment of \$2,000.
- The Lessee shall pay Lessor a production royalty on the basis of 8% of the gross value for fissionable metalliferous minerals and 4% of the gross value for non-fissionable metalliferous minerals.
- The lease will continue for a second ten (10) year term which will expire on **January 31, 2019.**

The Lessee has agreed to accept the readjusted terms of ML 48168 and will execute the readjusted lease agreement upon approval of the Director of the School and Institutional Trust Lands Administration.

GRAZING PERMITS

GRAZING PERMIT NOS. 23117-02 AND 11-B05 (LIVESTOCK TRESPASS – FINAL AGENCY ACTION)

It has been determined that the Earl and Sheila Gordon Trust, c/o Earl Gordon, P.O. Box 311, Huntington, Utah 84528, holder of GP Nos. 23117-02 and 11-B05, has been allowing its livestock to use the North Huntington Allotment beyond the established off-date, resulting in trespass. The grazing permits allow livestock to use the allotment from November 1 through December 15 each year. On January 22, 2009, a field inspection revealed 43 head of cattle belonging to the permittee remaining on the allotment. A letter has been sent to the permittee notifying him to pay trespass fees of \$653.56 prior to February 26, 2009. In addition to the trespass fees, a grazing suspension of 12 months will be imposed. The grazing billing for 2009/2010 will need to be suspended for one year until spring 2010 to enable this 12 month grazing suspension under GP 23117-02 and GP 11-B05. A certified notice was sent to inform the permittee of this action. Emery County. School Fund.

Upon recommendation of Mr. Ron Torgerson, the Director approved the above described Final Agency Action for livestock trespass under Grazing Permit Nos. 23117-02 and 11-B05.

The proposed power line will run from the newly constructed Three Peaks Substation and will intersect an existing 138 kV line near the WECCO Plant, and the easement corridor will run along the southern boundary of Section 32 and will parallel an existing 345 kV line currently operated by the applicant. The proposed easement corridor is 5,298.2 feet long and 60 feet wide, containing 7.13 acres. The proposed term of the easement is 30 years.

EASEMENT NO. 1435 (APPROVAL) (CONTINUED)**RELEVANT FACTUAL BACKGROUND:**

The Resource Development Coordinating Committee ("RDCC") review was initiated on September 22, 2008. Comments were received from the Iron County Commission and the Five County Association of Governments as follows:

Iron County Commission:

"In review of the proposed Rocky Mountain Power project, we have no objections to you granting an easement to Rocky Mountain Power for the 138 kV power transmission line as proposed. Thank you for the opportunity to review and comment on this project."

Five County Association of Governments:

"The Utah State Trust Lands Administration proposes to authorize an easement across the southern boundary of a state section near Iron Springs. The easement will allow the installation of a 138 kV power line by Rocky Mountain Power needed for the operation of iron mining in the area. Regional and local policies support the extension of electrical power for vital natural resource development."

The applicant has been notified of the comments provided by RDCC.

The Trust Lands Administration's staff archaeologist has reviewed the cultural resources survey that was conducted for this project by Bighorn Archaeological Consultants (U-08-HO-1026b,p,s). One potentially eligible site is located on trust lands near the project area. It was recommended that this site be avoided by all construction activities. Based upon avoidance of this site, archaeological clearance has been granted with a finding of "No Historic Properties Affected."

EVALUATION OF FACTS:

1. The proposed easement is not located entirely on trust lands.
2. The proposed easement term is for a period of 30 years.
3. The applicant has paid the School and Institutional Trust Lands Administration the fees as determined pursuant to R850-40-600.
4. The proposed easement will not have an unreasonably adverse affect on the developability or marketability of the subject property.

The action qualifies as an exclusion to the narrative record of decision process because it does not warrant the time and expense necessary to complete a full narrative record. Therefore, this summary will constitute the record of decision.

Upon recommendation of Mr. Chris Fausett, the Director approved Easement No. 1435 for a term of 30 years beginning February 1, 2009, and expiring January 31, 2039, with the easement fee being \$5,779.85 plus the \$750.00 application fee. The administrative fee required pursuant to R850-40-1800 has been paid in a one-time payment of \$1,000.00.

PREDESIGNATIONS**PREDESIGNATION NO. 730 (ISSUANCE OF CONDITIONAL DISCLAIMER OF INTEREST IN RIGHT OF WAY)**

Uintah County, 152 East 100 North, Vernal, Utah, 84078, has submitted documentation which indicates that the following described roads meet the requirements set forth by the Trust Lands Administration Board of Trustees in Board Policy 2006-01 to be conditionally recognized as valid existing rights pursuant to federal law prior to the title of the property vesting in the State of Utah.

LEGAL DESCRIPTION:

The following descriptions are based upon the geographic coordinate system using the NAD83 Datum. The source is GPS mapping grade data as indicated in the metadata and/or the transportation data model of the State of Utah Geographic Information Database ("SGID").

The road segment itself is the monument that is identified by its physical presence on the land. The location of said physical presence is closely approximated by mapping grade Global Positioning System ("GPS") data. Said data are checked against the corresponding gray-scale 1-meter Digital Orthophoto Quadrangles published by the United States Geological Survey ("USGS") to verify a reasonable degree of accuracy. In circumstances where accurate satellite signal acquisition is not possible, such as deep, narrow canyons or under a canopy of dense foliage, or where very sharp curves in the road make accuracy questionable, such portions of the road were digitized from the corresponding gray-scale 1-meter Digital Orthophoto Quadrangles published by the United States Geological Survey ("USGS").

The following description closely approximates the location of the centerline of the physical monument based on mapping grade Global Positioning System ("GPS") data as defined above:
